

Sales Performance Analysis

Objective

To analyze sales performance across regions, categories, and time, and provide actionable insights for business improvement.

Data Overview

The dataset consists of 9,800 records including customer, product, regional, and sales information. Data was cleaned by converting date fields, removing missing values, and eliminating duplicates.

Key Metrics

- **Total Sales:** 2261536.78
- **Average Sales:** 230.76

Key Insights

- **West and East regions** generate the highest sales, while **South underperforms**
- **Technology category** leads in overall sales
- Sales show **seasonal trends**, peaking from **September to December**
- A few products contribute most of the revenue (**top products dominate**)
- **Consumer segment (~50%)** is the largest contributor

Recommendations

- Focus growth strategies on **high-performing regions (West, East)**
- Improve **South region** through targeted marketing
- Expand and promote **Technology products**
- Launch campaigns **before peak months (Sep–Nov)**
- Promote **top-selling products** for higher revenue
- Target **Consumer segment** with personalized offers

Conclusion

The analysis reveals clear regional and seasonal patterns along with strong dependence on key products and customer segments. Leveraging these insights can significantly enhance sales performance and business strategy.
